EXPLANATORY.

IT is our intention to give in a convenient form, the GUNNING LAWS of the UNITED STATES AND CANADA. While necessarily a summary, this book contains the gist of all laws in force, affecting seasons, limitations as to number, transportation, and non-resident requirements.

To secure brevity, CATCH or KILL are used for the more extended terms of the Statute; *i. e.*, "Catch, kill destroy, injure or pursue with such intent," etc.

Where no close season is specified, there is none.

Transportation, sale or possession of game at any time when it is unlawful to kill such game, is unlawful, except that various States allow from four days to three weeks, for the sale of game, after the expiration of the open season for killing.

Night shooting, and shooting of birds other than game birds and birds of prey, is forbidden.

Nests and eggs of all birds (except of prey) are always protected.

Snaring and netting game birds are forbidden; also killing in any other manner than with a shoulder gun.
